SPLIT SYSTEM
AIR CONDITIONERS**

BROAN® HIGH EFFICIENCY UP TO 14 SEER SPLIT SYSTEM AIR CONDITIONERS

Broan up to 14-SEER air conditioners provide you with reliable, year-round comfort.

Broan split systems include two main components. The outdoor section is an air conditioner. The indoor section is a furnace and indoor coil.

Using a variable-speed furnace can improve 13-SEER system efficiency up to 14 SEER, as well as indoor air quality and sound levels. By mixing air from floor to ceiling, the variable-speed technology creates more uniform temperatures, improved air filtration and reduced humidity levels.

All Broan air conditioners are built using proven, reliable parts. Each part is examined carefully with our rigorous quality check process. This process ensures approximately 144 inspections before any system ever leaves our manufacturing facility.

ENERGY EFFICIENCY

Broan air conditioners are rated in Seasonal Energy Efficiency Ratio (SEER). A higher SEER rating makes it easier for your system to perform more efficiently, save more energy and lower your utility bills.

Annual costs based on 36,000 Btu unit, 1,500 cooling load hours and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

ADVANCED TECHNOLOGY

All air conditioner models include all-aluminum Micro-Channel coils. These coils feature an innovative design that decreases unit weight and refrigerant requirements, while increasing reliability.

RELIABLE PERFORMANCE

Broan air conditioners feature a scroll compressor, one of the most reliable compressors available in North America.

QUIET COMFORT

Broan air conditioners include additional features for extra quiet-performance, such as swept-wing fan blades and sound reducing bases.

DURABILITY & STYLE

These models feature precoated steel cabinets and doors for superior quality and durability.

PEACE OF MIND

The Broan series of products feature a 10-year limited warranty on parts when the product is registered. Plus, our Quality Pledge states that your entire unit will be replaced if the compressor fails within the first 10 years of purchase, when registered and installed with a Broan matched indoor coil.

Ask your Broan heating and cooling contractor or visit us at www.broanhvac.net for warranty details.

Product registration required.

BROAN® INDOOR COILS

INDOOR SECTION

Indoor coils are designed to match your Broan outdoor unit (split system) to maximize efficiency performance. An uncased indoor coil is used for upflow and downflow applications. The coil is encased by the ductwork during installation. A cased indoor coil is installed on top of a furnace. Micro-Channel coils are made of all-aluminum. Eliminating copper helps these coils resist corrosion.

If you replace your air conditioner, Broan highly recommends that you also replace the existing coil with a matched Broan coil.* By doing this, you can ensure maximum efficiency and performance of your comfort system.

BROAN COMFORT SOLUTIONS

A new comfort system, can provide more than energy efficiency. Compatible whole-home indoor solutions address specific needs and can improve your indoor living experience. There are solutions for indoor allergens, humidity control and even room temperature control. Be sure to tell your contractor about any specific comfort issues you would like to resolve.

* A matched indoor coil is a requirement for coverage under Broan's Quality Pledge.

ENERGY DEFINITIONS

SEER – Seasonal Energy Efficiency Ratio
Measures cooling performance on air conditioner products.

As ratings increase, so does unit efficiency.
